PERSONAL PROJECTS

Personalized cloud storage using Raspberry pi (2019)

- A self hosted, secure personal cloud storage that can be accessed from anywhere in the world with internet access using open source software owncloud to store your files in one central location – protected from unauthorized access. This acts as an alternative to Dropbox, OneDrive and Google Drive, offering real data security and privacy

Yelpcamp (2019)

- A fullstack web app (MongoDB, Express, NodeJS) providing a persistent platform for browsing, creating and managing camping sites near you along with user authentication.

Customize your food - burger builder (2019)

- Burger builder is a single page, mobile responsive application built using React Js to allow authenticated customers to customize their own burger and order it.

Patatap clone (2018)

- Patatap is a portable animation and sound kit. With the touch of a finger create melodies charged with moving circles.

CERTIFICATES

Certified course on Web Development (Udemy) (2019)

A full stack web development course using NodeJS

Certified course on React JS for custom web applications (Udemy) (2019)
